## Lulu Spencer

(Julie Marie Berman)

Lulu broke up Dillon and Georgie's marriage, got pregnant with his child and had an abortion. Her friend Diego was killed and she lost her mom to catatonia for a second time. "That girl has been through more this year than I've been through in my entire life [laughs]. But it's been good for her because she grew up a lot and learned a lot. You have to make mistakes and go through pain to become stronger and smarter."

**What was her biggest mistake?** "Being so selfish and impatient that she decided to break up Georgie and Dillon with a lie. If she hadn't done that, everything else wouldn't have happened. She lied to someone who was her best

friend, and she doesn't deserve him if she's going to go about it that way."

**Any favorite scenes?** "I got so excited with the pregnancy story because I really enjoyed the pressure of carrying story and working it to its fullest. Of course, I really enjoyed working with Genie [Francis, ex-Laura]. I learned so much from her in such a short period of time. I grew so much as an actress working with her."

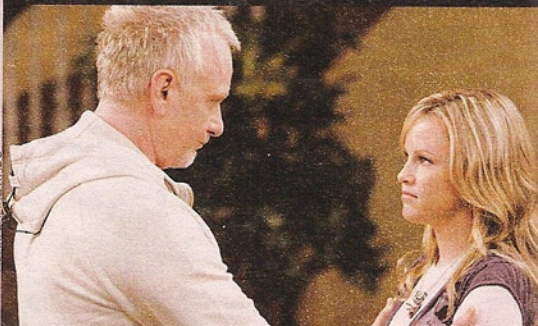

**And you survived the Luke and Laura frenzy.** "It was a lot of work [laughs]. I would read stories about celebrities who would have a photo shoot and then an interview and then they have to go to work. 'Oh, darn.' It never seemed that hard to me and for people to complain, it seemed so silly. But now, having been through the wringer myself [laughs], I realize how men-

tally draining it is. I feel so proud to be a part of the Luke and Laura story, but in order to speak about it to multiple people and try to say things in different ways, it gets really hard. But I enjoyed it. I'm so blessed to be [cast as] Laura's child."

**"Having been through the wringer myself, I realize how mentally draining it is."**

**Thoughts for Lulu's 2007?** "I hope next year will be easier on her. Maybe she'll fall in love without it being ruined — although I think that's impossible on GENERAL HOSPITAL [laughs]."

**Parent Stabilized:** Although having an abortion was devastating for Lulu, the experience did draw her closer to her father, Luke (Anthony Geary).
